

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) Transmission system (10) comprising a transmitter (12) and a receiver (14), the transmitter (12) being arranged for transmitting a plurality of signals (13), the plurality of signals (13) comprising mutually corresponding signals, the receiver (14) being arranged for receiving at least part of said plurality of signals (13), ~~characterized in that the~~ transmitter (12) is being arranged for transmitting information (15) identifying said mutually corresponding signals and ~~in that the receiver (14) is being~~ arranged for receiving said information (15), the receiver (14) comprising a selector (16) for selecting on basis of said information (15) at least one (17) of the mutually corresponding signals based on capabilities of the receiver to process only said selected at least one of the mutually corresponding signals for presentation to a user.
2. (Currently Amended) Transmission system (10) according to claim 1, ~~characterized in that wherein~~ the plurality of signals (13) comprises radio and/or television signals.
3. (Currently Amended) Transmission system (10) according to claim 2, ~~characterized in that wherein~~ the mutually corresponding signals (13) relate to a same channel or program.
4. (Currently Amended) Transmission system (10) according to claim 3, ~~characterized in that wherein~~ the mutually corresponding signals (13) comprise analog and digital signals of the same channel or program.
5. (Currently Amended) Transmission system (10) according to claim 3, ~~characterized in that wherein~~ the mutually corresponding signals (13) comprise standard definition and high definition signals of the same channel or program.
6. (Currently Amended) Transmission system (10) according to claim 1, ~~characterized in that wherein~~ the selector (16) is arranged for selecting the at least one (17) of the mutually

corresponding signals for inclusion in a list of available channels or programs for presentation to a user, such list representing only those signals from said plurality of signals that are capable of being received or processed by said receiver.

7. (Currently Amended) Transmission system-(10) according to claim 1, ~~characterized in that wherein~~ the selector-(16) is arranged for selecting the at least one-(17) of the mutually corresponding signals ~~also on basis of capabilities of the receiver (14) and/or based~~ on a quality of the received signals-(13) and a quality of reception conditions at the receiver.

8.-10. (Canceled)

11. (Currently Amended) A method of receiving at least part of a plurality of signals-(13), the plurality of signals-(13) comprising mutually corresponding signals, ~~characterized in that the method comprises~~ comprising:

- receiving at a receiver information (15)-identifying said mutually corresponding signals, ~~and~~
- selecting on basis of said information (15)-at least one of the mutually corresponding signals based on capabilities of the receiver to process only said selected at least one of the mutually corresponding signals.
